

Kaagaz

Features of Kaagaz Scanner

QR Scanner, QR Reader, Barcode Reader & QR Creator all rolled into one.

Features of Kaagaz Scanner: -

- **Safe & Secure:** - Security of documents is core to Kaagaz. The app can work completely offline, making sure that the documents stay on your phone only. In case of cloud storage also, the documents are completely encrypted and stored on highly secure servers in India.
- **Document Scanning:** - Kaagaz Scanner allows users to quickly scan various types of documents, including receipts, invoices, notes, contracts, and more, using their smartphone camera.
- **Multiple Scan Modes:** - Users can choose between different scanning modes such as black & white, grayscale, or color, depending on their preference and the type of document being scanned.
- **Batch Scanning:** - Kaagaz Scanner supports batch scanning, allowing users to scan multiple pages consecutively and save them as a single document.
- **OCR (Optical Character Recognition):** - This feature enables users to extract text from scanned documents, making them searchable and editable. It supports multiple languages for OCR, enhancing usability for a diverse user base.
- **No Watermark:** -Kaagaz doesn't have any unwanted Watermark in the App. You can infact have a 'Custom Watermark' to personalize your documents. Kaagaz provides you a seamless experience, that too completely Free.
- **Cloud Integration:** - Kaagaz Scanner integrates with cloud storage services like Google Drive, Dropbox, and OneDrive, enabling users to automatically backup their scanned documents and access them from anywhere.
- **User-Friendly Interface:** - The app boasts an intuitive and user-friendly interface, making it easy for both novice and experienced users to navigate and utilize its features effectively.
- **Built for Bharat:** - Kaagaz is a completely Indian app built for the Bharat users. It is available in 8 Indian languages, giving you the freedom to use the app in a language that you are most comfortable in.
- **Scan & Share:** -It is very easy to Scan any document using Kaagaz. Just click a photo, adjust the borders & apply filter of your choice and your document is ready to be shared as a PDF or Image.
- **Store & Organize:** - Kaagaz is also an organized storage space for all your documents on your phone. You can organize documents by making Folders in Kaagaz. You can also search for documents easily. Also, you can back-up documents on Kaagaz Cloud so that you don't lose them ever.

- **Edit Documents:** - Kaagaz has many tools that help you edit PDF documents easily. Whether it is to merge two documents, split any document, compress the document size etc. You don't have to now search for these tools separately and struggle with them.
- **Auto Edge Detection:** -Kaagaz can automatically detect edges of any document making it very easy & fast to scan documents.
- **Image Enhancement:** -Kaagaz can enhance the page quality significantly with its 5 different image enhancement filters.
- **PDF Reader:** -Kaagaz is also your default PDF reader so that you don't need any another app to open PDF documents.
- **Clicking Photos:** -To start scanning a document, click on the green '+' button. Here you can click photo of the page that you want to scan by clicking on the "Camera" button. You can click photos of as many pages as you want in a particular document. After you are done clicking all the photos, click "Proceed" button.
- **Cropping Pages:** -After you press "Proceed" button, you will come to the Cropping screen. Here you can adjust the borders of the page. Click "Next" when you are done with adjusting the borders. If you are scanning more than 1 pages in the document, you will have to do the border adjustment for each of those pages one by one by clicking "Next". After you have cropped all pages, click "Next" button.
- **Applying Filters:** -After you have click "Next" button, you will come to the Filter application step. There are 6 filter available:
 - - Original (Keeps original photo)
 - - Magic Color 1 (Best for documents with colors)
 - - Magic Color 2 (Similar to Magic Color 1 but with a little more brightness)
 - - White Magic (Best for Documents with white background)
 - - B & W (for Black & White effect)
 - - Gray (for Gray effect)
- You can choose any of these filters as per your requirement. After this you can click "Done" to complete the scan. Same filter gets applied to all pages automatically and your document scan is complete. If you want to change the filter on any page, you can do that with the Edit option that you get when you open any page.

User Experience (UX) of Kaagaz Scanner

Onboarding Icon: - When users first launch the Kaagaz Scanner app, they are greeted with an onboarding icon that provides a quick overview of the app's key features and functionalities. This icon serves as a visual guide to help users understand how to use the app effectively right from the start.

Login/Sign-up: - I am brought to the sign-up/login screen. Kaagaz uses standard display, offering sign-up functions with both Phone number and Facebook.

Highlighted Scan PDF Button: - On the home screen, the "Scan PDF" button is prominently highlighted in **green color**, making it the focal point of the interface. This design choice draws the user's attention to the primary function of the app – scanning documents to create PDFs – and encourages them to act immediately.

Scanned PDFs on Home Page: - After scanning documents, the app displays all the scanned PDFs on the home page, making it easy for users to access their documents quickly. This layout ensures that users can easily find and review their scanned files without having to navigate through multiple screens.

Simple Interface: - The app features a clean and straightforward interface, making it easy for users to navigate and access its various functionalities without any confusion.

Guided Scanning Process: - Kaagaz Scanner guides users through the scanning process with clear instructions, ensuring that even first-time users can easily capture high-quality scans.

Auto Edge Detection: - The app's auto edge detection feature eliminates the need for manual cropping, saving users time and effort while ensuring that the entire document is captured in the scan.

Different Navigations on Home Page: - Kaagaz Scanner offers different navigation options for various features and functionalities, including:

- **Posters:** This navigation likely leads users to a feature where they can scan, edit and digitize trending, religious, business, inspiration posters.
- **PDF Tools:** This section probably provides users with tools and options to edit, annotate, or enhance their scanned PDFs.
- **Coins:** It seems like Kaagaz Scanner incorporates a gamification aspect with a "coin's" feature, where users can earn rewards or unlock premium features by completing certain tasks or achieving milestones.
- **Your Account:** This navigation likely leads users to their account settings, where they can manage their profile, preferences, and subscription details.

Edit Options: - After uploading documents, users are provided with editing options such as crop and size adjustment. This enables users to fine-tune their scanned documents to meet their specific requirements, ensuring optimal quality and readability.

Filters: - Kaagaz Scanner offers six different types of filters that users can apply to their images or documents. These filters allow users to enhance the appearance of their documents or add artistic effects, providing them with greater flexibility and customization options.

Additional Options Before Final Stage: -

- **Add Page:** Users can add additional pages after the scanning to their scanned document, this feature is amazing and helpful and allowing them to combine multiple pages into a single PDF.
- **Share:** Users can share their scanned documents with others via various platforms or communication channels.
- **Edit PDF:** Users can further edit their PDF documents, such as adding annotations, signatures, or text, to tailor them to their needs.
- **Download PDF:** Users can download their scanned documents to their device for offline access or sharing purposes.

Overall, Kaagaz Scanner offers a comprehensive and user-friendly experience, with intuitive navigation, clear visual cues, and a range of features designed to streamline the document scanning and editing process. These elements contribute to a seamless and efficient user experience, ensuring that users can easily digitize, edit, and manage their documents with ease.
